

Blockbeard's Gold Race

An esports world that tests your Minecraft knowledge and skill as you compete for the fastest time in a race through Blockbeard's island.

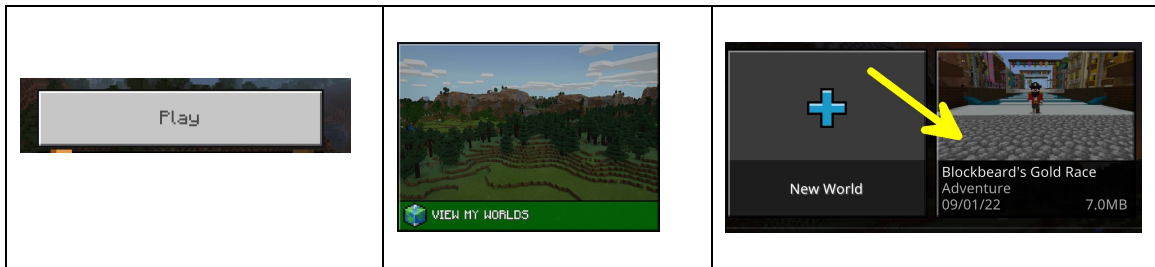

Player Guide

Loading the World

1. Download the world from the Microsoft Lesson Library or other location provided by your teacher/coach/parent or other trusted source.
2. When downloading the world, you should have a file with a **.mcworld** file extension. (Example: *BlockbeardsGoldRace_v1-0-0.mcworld*)
3. Import the world into Minecraft Education Edition. (*Java and Bedrock edition not supported.*)
 - a. You can Double-click the .mcworld file on computer or Open/Run the file on other devices.
 - b. You may also select the Import button and select the world file from download folder on your local device.

4. After the world is imported, you can open it to get started.

Getting Started

Single Player or Co-Op Only

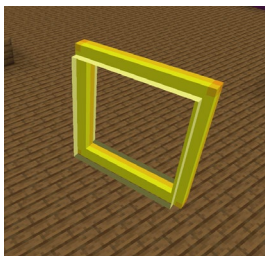

This is not a PVP world. Any players that join this world will be playing on the same team. The first player to reach a checkpoint will advance all other players to that checkpoint, so your total time will be the fastest times to each checkpoint. Make sure to share any items found in chests.

To compete against other players/teams, play each game on your own device and submit your scores to determine the winner.

Talk to Blockbeard to start the race!

The timer will start immediately after starting the race, so make sure you and your teammates are ready to go.

Checkpoints

Reach the checkpoints along the way. If you die at anytime in the game, you'll respawn at your last checkpoint.

Finish

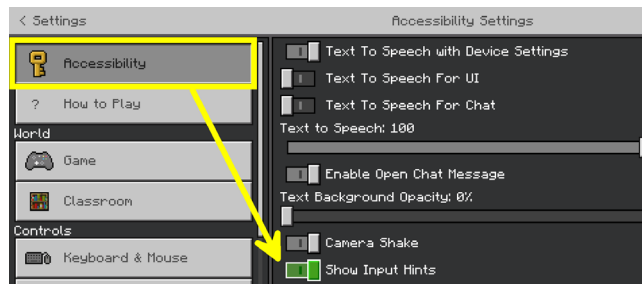

Cross the finish line to stop the clock and see your final time.

Note: Hit the "Chat" key to view your split times for each checkpoint.

Helpful Tips

This is a timed race, so you have to use your Minecraft knowledge and skill to navigate the course as quickly as possible.

On-Screen Controls

For help with navigation, Show Input Hints.

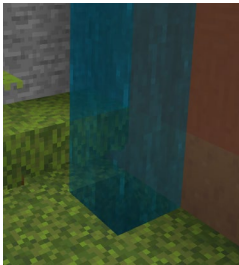

The lower-left area of your screen should give you the option to show/hide the controls for your game platform.

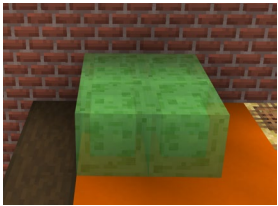

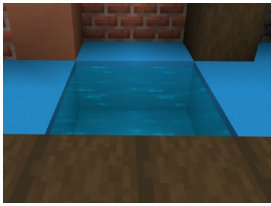

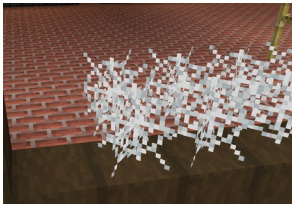

Double-tapping Forward will activate sprinting.

Walk	Sprint	Sprint + Jump
		
Walking is slow, but useful when navigating tricky areas	Sprinting is faster than walking	Sprinting and jumping is faster than just sprinting

	Crouching is the slowest way to move. Hint: <i>You can not walk off the edge of a block while crouching. This is useful for parkour or navigating steep cliffs.</i>		Use Sprint while swimming to swim faster.
--	--	--	---

Climbing – These are some items you can use to climb up or down walls			
Scaffolding	Vines	Ladders	Water
			

Preventing Fall Damage – Landing on certain blocks can reduce or eliminate fall damage

Slime Blocks	Water	Beds	Cobwebs
			

Your Health

This is your health bar.

When you take damage, you will lose hearts. You will respawn at the last checkpoint if you lose all your hearts.

When underwater, your oxygen supply will appear as bubbles. When your bubbles are gone you'll start losing health. Find air!

Your Hunger

This is your hunger bar. You will get hungry from all that running! Your health will regenerate when your hunger bar is full.

When your hunger bar starts getting low, you will stop regenerating health. Make sure to eat food to fill your hunger bar.

When your hunger bar gets too low, you will lose the ability to sprint. Eat food to fill your hunger bar!

Map Overview

This is an overview of the areas between each checkpoint. There are many ways to reach a checkpoint. You must find the fastest way to navigate to victory.

NOTE: *Many areas have a difficult path that could be faster for more skilled players. If you have difficulty, you can look for a less difficult path that may take a little extra time.*

Play Again

Each time you play, you can improve your skill and find new ways to finish the race faster!

After completing a race, Save & Exit the world and start a new world to race again!
